

This Week's Must-See Art Events

by MICHAEL ANTHONY FARLEY on FEBRUARY 13, 2017

Friday: Jeremy Couillard – *Alien Afterlife*

The description for this solo show is a narrative about a woman in a dystopian future finding a contemporary video game. We're expecting this to be a downright trippy dive into a fully-imagined alternate reality. The video game itself will be playable in the gallery, along with physical artifacts from Couillard's universe.
